

# Bioxis pharmaceuticals, CEO meets Russian & Finnish Prime Ministers

**Moscow, Russian Federation – October 31, 2013:** BIOXIS Pharmaceuticals was selected to present its ultrapure chitosan matrix and showcase its use in the field of regenerative medicine during the Open Innovations Forum in Moscow, Russia.

At the Forum, BIOXIS founder and CEO, Frédéric Bertaina presented the MTI12 technology to Russian Prime Minister Dmitry Medvedev, and Finnish Prime Minister Jyrki Katainen.

The forum gave the company a chance to present its powerful regenerative technology and its broad range of applications; from dermal filler to wound healing, vectors for delivery of molecules to back pain. The forum also allowed BIOXIS to initiate new partnerships and financing opportunities with VCs and distributors.

## About Open Innovations Forum

The Open Innovations Forum is a platform for discussion, innovation and cooperation; bringing together key policy makers, venture capitalists, scientists, academics, and European business leaders in Moscow (Russian Federation).
