

Bioxis pharmaceuticals wins Award for its Regenerative Ultrapure Chitosan

Lyon, France – April 2014: BIOXIS has won the 2nd place award for French Best Medical Device Technology of the Year during the annual MEDTEC France congress. The award is granted for BIOXIS' regenerative dermal filler – based on ultrapure chitosan.

A jury of experts from Snitem, AP-HP, ACIDIM, Sorin Group, and BPI France, chose to award this groundbreaking MTI12 technology for the innovation potential it represents in various fields of regenerative medicine.

CEO and Founder of BIOXIS, Frédéric Bertaina says, "this award is a great recognition for our team, and has confirmed that biomaterials are a great solution to reach the as yet unmet needs of medical doctors".

The company currently focuses most of its resources in the development of the first Monophasic Tissular Inductor, based on chitosan, for the treatment of wrinkles and facial volumes, and is preparing its next investment round in mid 2015.

About MEDTEC Award

The MEDTEC Award is rewarded annually by a jury of experts during the MEDTEC France congress. MEDTEC France congress showcases innovative products for the Medical Device industry, and allows industrials to source technology and innovation for healthcare.
